Linktree: linktr.ee/mikeisresilient | Portfolio: mikeisresilient.vercel.app

PROFESSIONAL SUMMARY

Full Stack Engineer with hands-on experience building responsive web applications, production-ready mobile applications, decentralized applications, smart contracts, REST APIs, and blockchain data systems. Proficient in React, Next.js, TypeScript, React Native, Expo, Node.js, Django, Express, Rust, Prisma, PostgreSQL, Solidity, Ethers.js, Web3.js, Tailwind CSS, Auth.js, Paystack, Git, and modern deployment platforms. Experienced in designing user-focused interfaces, integrating APIs and databases, building secure application flows, and deploying scalable software. Passionate about creating fast, reliable, responsive products and simplifying complex technical concepts through teaching and documentation.

CORE SKILLS

Full Stack Web Development; Mobile App Development; Blockchain and Smart Contract Development; REST API Development; Database Design and Integration; Decentralized Applications and DeFi Systems; Technical Analysis of Financial Markets; Web3 Education and Mentorship; Research; Technical Writing and Documentation; Content Strategy and Copywriting; Team Collaboration and Technical Communication.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Rust, Solidity, HTML, CSS
Frontend and Mobile: React, Next.js, React Native, Expo, Vite, Tailwind CSS, shadcn/ui, Framer Motion
Backend and APIs: Node.js, Express.js, Django, Rust, REST APIs, Next.js Route Handlers
Databases and ORM: PostgreSQL, Prisma, Neon, SQL, SQLx
Authentication and Payments: Auth.js, NextAuth.js, JWT, bcryptjs, Paystack
Blockchain: Ethereum, Solidity, Ethers.js, Web3.js, Hardhat, Truffle, Foundry, Alloy, ERC20, ERC721, DeFi, DApps
Testing and Deployment: Mocha, Chai, Ganache, Ethereum Sepolia, EVM Testnets, IPFS, Git, GitHub, Vercel, Render, EAS Build
Other: Responsive Design, JSON, Microsoft Word, Excel, PowerPoint

PROFESSIONAL EXPERIENCE

Full Stack Engineer (Web & Mobile App) | BAIVAS | September 2026 – Present

- Developed and maintained web and mobile application features as part of the engineering team.
- Built responsive user interfaces and integrated frontend experiences with APIs and backend services.
- Contributed to application functionality, debugging, testing, and improvements across supported devices and screen sizes.
- Used modern web and mobile development tools to support maintainable and reliable product delivery.

Full Stack Web & Mobile App Developer | Self employed | 2023 – Present

- Designed and developed responsive web and mobile applications using React, Next.js, React Native, Expo, TypeScript, Django, Express.js, Prisma, PostgreSQL, and Tailwind CSS.
- Developed RESTful APIs, authentication systems, database integrations, payment flows, and administrative dashboards.
- Built modern user interfaces with responsive layouts and smooth animations using Framer Motion.
- Built backend and blockchain data systems using Rust, PostgreSQL, Ethereum RPC services, and REST APIs.
- Deployed and maintained applications on Vercel and Render for reliable performance and scalability.
- Used Git and GitHub for version control, collaboration, and project management.

Blockchain Developer | Independent Projects | 2023 – Present

- Designed and deployed Solidity smart contracts for ERC20 tokens, staking systems, voting mechanisms, and digital estate applications on EVM compatible networks.
- Implemented modular contract architectures and access control logic to improve security, maintainability, and upgrade flexibility.
- Wrote and executed unit tests using Hardhat, Mocha, and Chai to validate contract logic and reduce deployment risk.
- Integrated smart contracts with React based frontends using Ethers.js and Web3.js to enable user interaction with decentralized applications.
- Deployed applications to test networks and validated transactions, gas usage, and contract behavior prior to mainnet readiness.
- Built ChainPulse, a blockchain analytics platform using Rust, Axum, PostgreSQL, SQLx, Alloy, Ethereum RPC services, and blockchain data APIs.

Web3 and Crypto Tutor | CryptoSimplify Academy | 2022 – Present

- Founded and managed a learning platform focused on simplifying blockchain, cryptocurrency, DeFi, and trading concepts for beginners and intermediates.
- Designed structured learning paths covering Web3 fundamentals, market structure, risk management, and blockchain use cases.
- Mentored learners through practical explanations and real world examples, improving comprehension, confidence, and decision making.
- Delivered educational content through live sessions, written materials, and interactive discussions to support diverse learning styles.

Crypto Tutor | The Crypto Trybe Academy | 2024 – 2025

- Delivered practical training sessions on crypto fundamentals, Web3 concepts, and blockchain basics to diverse audiences.
- Explained complex topics such as trading psychology, market structure, and decentralized systems using simplified and relatable frameworks.
- Supported learners with hands on examples and guided discussions to reinforce understanding and application.

Copywriter | Direct Clients | 2023

- Wrote conversion focused landing pages and marketing content aligned with client goals and target audiences.
- Applied persuasive messaging and clear value propositions to achieve lead conversion rates between 55 and 79 percent.
- Collaborated with clients to refine messaging strategy and improve clarity, engagement, and audience response.

Affiliate Marketer | BestWay | 2022 – 2023

- Executed performance driven digital marketing strategies across online platforms.
- Educated over 25 individuals on sustainable affiliate marketing systems and ethical promotion practices.
- Strengthened skills in communication, persuasion, audience targeting, and results tracking.

Teaching Assistant and Educator | Christ Universal Children Fellowship | 2022 – 2023

- Taught moral instruction, mathematics, and English to over 46 learners.
- Improved learner confidence, discipline, and academic performance through structured lessons and mentorship.
- Supported classroom management and learner engagement initiatives.

Secretary | Sunny Computers | 2020 – 2023

- Managed administrative documentation using Microsoft Word, Excel, and PowerPoint.
- Maintained document accuracy levels between 90 and 95 percent through attention to detail and structured workflows.
- Supported daily office operations and coordinated tasks to improve efficiency.

SELECTED PROJECTS

ProStore E commerce Website | GitHub: github.com/mikeisresilient/prostore-ecommerce | Website: prostore-ecommerce.vercel.app

- Built a full stack ecommerce platform with Next.js, TypeScript, Prisma, PostgreSQL, Auth.js, and Paystack.
- Implemented product management, authentication, cart, wishlist, orders, currency conversion, admin dashboard, inventory management, and payments.

ProStore Android Mobile Application | GitHub: github.com/mikeisresilient/prostore-mobile | Expo EAS build (Install APK): https://expo.dev/accounts/mikeisresilient/projects/prostore-mobile/builds/b4a62dbb-afe1-4bcf-9045-f1ea4cad335b

- Built a production ready mobile ecommerce application with React Native, Expo, TypeScript, Next.js APIs, Prisma, PostgreSQL, and Paystack.
- Implemented authentication, product browsing, cart, wishlist, checkout, payment verification, order management, currency support, and light and dark mode.

ChainPulse | Rust blockchain analytics platform GitHub: https://github.com/mikeisresilient/chainpulse-frontend | Website: https://chainpulse-frontend.onrender.com/

- Built a blockchain analytics backend using Rust, Axum, PostgreSQL, SQLx, Alloy, Ethereum RPC services, and blockchain data APIs.
- Implemented wallet management, transaction retrieval and pagination, Ethereum network data processing, market data retrieval, database persistence, and REST API endpoints.

Resilient Staking DApp | GitHub: github.com/mikeisresilient/resilient-staking-dapp | Website: resilient-staking-dapp.vercel.app

- Built a decentralized staking platform enabling users to stake ERC20 tokens and earn rewards.
- Developed Solidity smart contracts and a React frontend integrated with Ethers.js.
- Tested and deployed contracts using Ethereum Sepolia, Hardhat, Mocha, and Chai.

Digital Will DApp | GitHub: github.com/mikeisresilient/chronara-digital-estate

- Developed a blockchain based digital estate and inheritance management application.
- Implemented automated asset distribution based on predefined conditions and integrated IPFS for decentralized storage.

Voting DApp | GitHub: github.com/mikeisresilient/Voting-DApp

- Built a secure decentralized voting system using Solidity smart contracts.
- Implemented ERC20 based voting rights and transparent vote tally mechanisms.

ERC Token Development | GitHub: github.com/mikeisresilient/crypto-token-contract

- Designed and deployed a custom ERC token smart contract with minting, transfer, approval, and ownership functionality.
- Tested contract interactions using scripts and wallets on EVM test networks.

FromZeroHQ Website | GitHub: github.com/mikeisresilient/fromzerohq-website | Website: fromzerohq.vercel.app

- Designed and developed the official FromZeroHQ website using React, Vite, Tailwind CSS, and Framer Motion.
- Built responsive marketing pages, case studies, Google Calendar booking integration, founder profile, and conversion focused UX.

TMGreatness Website | GitHub: github.com/mikeisresilient/tmgreatness-website | Website: tmgreatness-website.vercel.app

- Designed and developed the official TMGreatness website using React, Vite, Tailwind CSS, and Framer Motion.
- Built a responsive, high performance interface with smooth animations and deployed it to Vercel.

Blockchain Assessment | GitHub: github.com/mikeisresilient/blockchain-assessment

- Built a full stack blockchain application using React and Express featuring wallet generation, transaction handling, proof of work mining, blockchain persistence, and a blockchain explorer.

Training Attendance Management System | GitHub: github.com/mikeisresilient/training-attendance | Site: training-attendance.onrender.com

- Developed a Django based attendance platform with participant registration, organiser dashboard, and CSV/Excel export.

Little Lemon Restaurant Website | GitHub: github.com/mikeisresilient/little-lemon-website | Site: https://little-lemon-website-vbbb.onrender.com/

- Built a full stack Django restaurant website featuring reservations, dynamic menu, and administration dashboard.

EDUCATION

Doctor of Pharmacy (PharmD) | Abia State University (ABSU) | 2026 - 2032

Full Stack Blockchain Development | BYU Pathway Worldwide | 2023

Microsoft Office Suite Certification | Sunny Computers | 2021 – 2022

Senior Secondary School Certificate | Compass Secondary School | 2021

ACHIEVEMENTS AND LEADERSHIP

- Recognized for impactful teaching on perseverance and time management.
- Led school clubs and societies with measurable improvements in participation and engagement.
- Delivered motivational talks influencing positive mindset shifts and personal development.

COMMUNITY INVOLVEMENT

- Public speaker on over 20 topics including wealth creation, motivation, emotional intelligence, and personal development.
- Participated in community sensitization, service, and sanitation initiatives.
- Known for strong listening skills, thoughtful responses, and conflict resolution abilities.

INTERESTS

Reading, research, table tennis, writing, creative expression, continuous learning
